Reference First (Ruby-Doc is a joke...):

http://www.ruby-lang.org/en/documentation/

I think this is good (with example and search):

http://www.rubydoc.info/stdlib (select core or other packages. You can also search rails documentation by "Featured")

Another searchable rails documentation:

http://railsapi.com/doc/rails-v3.0.3/

Documentation with search and comment (but the content is poor)

http://apidock.com/
